FURTHER SAFETY GUIDE LINES

• Our AirTracks and all of the Spring- Air-pieces, like the: -blocks, -slices, -boards, -floors and/or -rolls are not for play in water. Do NOT use them for play in water.

The so called Airgym AirTrack like the Spring- Air-Floors and/or Air-pieces set up should only be done by authorized or competent persons.

- Always check the surface, it must be clean, dry and even. When outside always use ground sheet under the AirTrack (for extra protection of the AirTrack).
- To move use the handles on each side (...hold the belt handles instead), and never drag the Air Track.
- There should always be an appropriate accompaniment to the track and/or Air pieces side if it is in use.
- Don't use the AirTrack and/or Air pieces in damp spaces, or in the rain.
- Don't store the AirTrack and/or Air pieces dirty or wet.
- Do not use the AirTrack and/or Air pieces with shoes.
- If using a manometer (pressure gauge) during inflation, be sure to remove the manometer while the Air track is in use.
- Place safety matting at the ends of the AirTrack.
- Once using the track there should be a mat for landing, this can be connected by the Velcro closure which will avoid also the small space created by the round shape of the AirTrack.

The safety rules above will help you enjoy your AirTrack and/or Air pieces for many years.
